

## How to create a bespoke wall unit system perfect for your home

Visit *IQ Furniture NEW SHOWROOM*

*Transform your home with bespoke built-in storage, which will save you space and give your rooms a smart, streamlined look.*

**M**ost living rooms have TV's/home cinema systems, although there are also homes that have a separate family room or entertainment area. Combining the two is common if the space is limited. However spacious your home is, it is important to create the perfect storage systems for TV's, home cinema centres, computers and an ever-growing collection of possessions, no matter how challenging it is.

Bespoke wall unit systems will make the most of the space and is ideal for awkward room layouts maximising storage space.

Create a stylish wall unit system perfect for your home and uses. Use coloured panelling, sliding to reveal each new time aspects of the same composition, transforming its appearance and functions, for example from bookcase to TV unit. A scenario

which changes according to the time of day or inner state of mind, always with an elegant and coherent style.

IQ Furniture's Metropolis wall unit, by STUDIO IQ, is a modular bookcase design offering infinite layout possibilities.

Metropolis gives you the chance to freely compose your own bookcase, thanks to its incredible modularity measured to the millimetre. Its free-standing or wall-hung elements offer the further advantage of integrating with Metropolis design modules,

providing a unique design of enviable versatility and impeccable Italian style. A huge range of finishes is available: besides the 20 lacquered

colours of the collection, with gloss or matte finish, you can choose between natural wood, glass, mirror and natural stone finishes, which ensure an absolutely unique product.

Design consultants at IQ Furniture are on hand to ensure that your requirements are matched down to the finest detail so you can create the perfect design for your space.

We want to know what items you need at your fingertips. Our bespoke wall unit system is built with your specific tastes and needs in mind. Built-in cabinets, cubbies, dividers, work desks, shelves, TV units and storage drawers can all be included into your contemporary wall unit.

Our designers at IQ Furniture can transform your walls into functional, organized work of art designed to fit your needs. ■
